SHANTANU JUMALE

AI & ML Undergraduate | Internship Candidate

About Me

I'm an AI & ML student who actually cares about building real systems, not just collecting certificates and projects for LinkedIn. I focus on learning fundamentals and applying machine learning to real-world problems. I'm disciplined, consistent, and serious about long-term growth in tech, especially in AI, sustainability, and impact-driven innovation.

Education

B.Tech in Artificial Intelligence & Machine Learning (AIML) SIT Nagpur
2025 – Present
B.Tech in Computer Science & Engineering
Symbiosis Institute Technology Nagpur

Education:

Programming: Python, C, C++, Java (basic)
ML/AI: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
Core CS: Data Structures & Algorithms, OOPS, DBMS, OS (basics)
ML Concepts: Data Preprocessing, Feature Engineering, Model Training, Evaluation Metrics
Tools: Git, GitHub, Jupyter Notebook

Strengths

- Logical thinking
- Discipline and consistency
- Fast learner

Projects

AI-Based Early Warning System for Crop Diseases (PBL Project)

- ML-based early detection model for crop disease risk
- Built data preprocessing and prediction pipeline
- Real-world agricultural impact focused project

Student Performance Prediction System

- Machine learning model using multi-attribute dataset
- Implemented missing value handling, outlier treatment, visualization
- Algorithm comparison and accuracy optimization

Heart Disease Prediction System

- Healthcare ML prediction system
- Classification models with evaluation and performance analysis

Career Vision

Long-term goal: build AI systems for climate change, sustainability, and large-scale social impact—not academic demos
